Newsletter

President's Message

I would like to wish all IAS members and associates a very happy New Year, with 2012 being the Year of the Dragon. The Chinese New Year celebrations are now over and our hosts of the 6th World Congress for Allelopathy in Guangzhou and all conference participants are now reflecting back on a very successful meeting, held at the Hotel Canton from

December 15-19 in the old city of Guangzhou. The surrounds included lovely older buildings, shopping districts, tree lined streets and parks, and many hotels and restaurants. I would like to sincerely thank our hosts and conference organizers, Prof. Shiming Luo and Rensen Zeng, and their competent staff of postgraduate and undergraduate students for an excellent conference. With mild weather and over 220 registered attendees from 35 countries present, the meeting commenced on Thursday December 15 with a welcome dinner and the IAS board meeting. The conference was opened on Friday December 16 by introductory remarks from the President of Southern China Agricultural University, and conference organizer Professor Luo Shiming. The society appreciates the efforts of S. China Ag University which provided major support as the host institution for the 6th World Congress.

The conference was kicked off each day with an excellent series of keynote addresses which covered topics ranging from allelopathy and the search for novel modes of action from allelochemicals, soil rhizosphere interactions and impacts upon allelochemical persistence, plant allelopathy and insect/fungal interactions, localization of allelochemicals and their release into the rhizosphere, improving our publications in the field of allelopathy, and future trends in publication of allelopathy research. The meeting was divided into various topics for oral presentations and posters, with up to 3 concurrent sessions running daily. All were well attended. The conference also featured an entertaining banquet featuring singing by our hosts and other participants, and a field trip to southern Canton production areas where we visited areas of

horticultural production, glasshouse production, a historic Chinese village from the Guangzhou region, and the lights of modern Guangzhou City at night. The business meeting was held at the conclusion of the conference on Monday afternoon, with the presentation of IAS awards for outstanding research (Molisch Award), publication (Grodzinsky Award) and oral communication by students (Rice Award). Congratulations and awards plaques were provided to Drs. Prasanta Bhowmik and Francisco Macias, joint winners of the Molisch Award, Dr. Rensen Zeng, winner of the Grodzinsky Award and winner Changxun Fang of the Rice Award. The IAS Board introduced Dr. Manuel Reigosa, host of the upcoming 7th World Congress of Allelopathy, to be held in Vigo Spain in July 2014. Dr. Reigosa described the lovely and historical surroundings that await conference participants travelling to Vigo in 2014 with a slide presentation. It should be a great event and we look forward to another fantastic congress, this time in Europe. The new IAS board was introduced, after several dedicated members stepped down from their respective posts and were acknowledged for their hard work and efforts. Catherine Fernandez of France was introduced and agreed to serve as IAS secretary, replacing Inderjiit, and David Gealy of USA has agreed to serve as treasurer, replacing Prasanta Bhowmik. The society also thanked Yoshiharu Fujii of Japan for his service as past president, Steve Duke of USA for his dedicated service as president, and introduced Leslie Weston of Australia as incoming President. The new Vice President is Rensen Zeng of China. Five new international delegates will also be appointed to serve as advisors to the IAS Board. In the final minutes of the 6th World Congress, the board and audience thanked the conference organizers for their efforts in organizing such a successful event. Well done and thanks to all who travelled from afar to attend! Research results from selected presentations will be showcased in upcoming issues of Plant and Soil and Journal of Chemical Ecology in 2012. IAS Editor Azim Mallik and John Romeo, Editor of Chemical Ecology will be working to coordinate these efforts in 2012, and we look forward to viewing these outstanding contributions in press.

Leslie A. Weston, IAS President

6th World Congress on Allelopathy

Group photos of the participants of the 6th World Congress on Allelopathy

Report by Dr. Rensen Zeng

The 6th World Congress on Allelopathy (6th WCA) of the International Allelopathy Society (IAS) was held in the Guangzhou, China from December 15 to 19, 2011. This congress was hosted by South China Agricultural University leading by the Chair of Organization Committee and Program Vice President of IAS Prof. Shiming Luo and the Co-chair and Secretary Prof. Rensen Zeng. The theme of the 6th WCA is "Allelopathy

Research for Sustainable Development - from theory to practice". The meeting received over 220 registered attendees from 35 countries around five continents. In the opening ceremony, IAS President Dr. Stephen Duke gave an opening address and President of South China Agricultural University, Prof. Xiaoyang Chen, delivered a welcome speech.

President Dr. Stephen Duke in the opening ceremony of the 6th WCA

The congress invited 13 plenary speakers including Dr. Anne Osbourn from John Innes Centre

at Norwich Research Park (UK), Prof. Guodong Wang from Chinese Academy of Sciences (China), Dr. Stephen Duke from USDA –ARS (USA), Prof. Leslie Weston from Charles Sturt University (Australia), Prof. Azim Mallik from Lakehead University (Canada), Dr. Yoshiharu Fujii from National Institute for Agro-Environmental Sciences (Japan), Prof. Inderjit from University of Delhi (India), Prof. Prasanta C. Bhowmik from University of Massachusetts (USA), John Romeo from University of South Florida (USA) and Jingquan Yu from Zhejiang University (China). The congress had 138 oral presentations and 106 posters from 11 diverse symposiums :

An assembly during the 6th World Congress on Allelopathy

including (1) Allelopathy in agriculture (divided into 4 subsections) , (2) Allelopathy in horticulture and forestry, (3) Allelopathy in natural ecosystems, (4) Allelopathy and rhizosphere ecology, (5) Allelopathy and invasive plants, (6) Chemistry of allelochemicals,

(7) Allelochemical interactions and environmental fate of allelochemicals, (8) Allelopathy: methodology and modeling, (9) Physiology, biochemistry and molecular biology of allelopathy, (10) Allelopathy mechanisms, (11) Plant – microbe and Plant – insect interactions. During the congress, the IAS committee meeting and business meeting were held. The IAS constitution and bylaws were amended, and new president and officers were elected in the congress. The new IAS board includes Leslie Weston of Australia as new president, Steve Duke of USA as past president, Catherine Fernandez of France as IAS secretary, David Gealy of USA as treasurer, Rensen Zeng of China as president-elect and Manuel Reigosa of Spain as Program Vice President. The IAS issued the Molisch Award to Drs. Prasanta Bhowmik and Francisco Macias, the Grodzinsky Award to Dr. Rensen Zeng, the Rice Award to Changxun Fang. The society decided to have the 7th World Congress of Allelopathy in Vigo of Spain in July 2014.

The participants were visiting local farm in the Pearl River Delta.

Financial report by Pr. Luo Shiming

As the Chair of Local Organizing Committee of the congress,

I would like to give you the financial report of this congress. We received 3,540 US\$ IAS membership fee from 55 persons in Guangzhou. This amount will be transferred to the appointed bank account of IAS as required. The total registration fee collected from participants was 41,841.82 US\$. The total expenditure was 75,312.76 US\$.

The subsidy for 30 participants from 14 countries reached 15.97% of the total expenditure, or 28.74% of the registration fee collected. The registration fee covered 55.56% of the total expenditure. Other 44.44% was covered by donation received from 5 donors including South China Agricultural University, National Natural Scientific Foundation of China, State Key Laboratory of Conservation and Utilization of

Subtropical Agro-bioresources, Key Discipline Development Project of Guangdong Education Bureau, and Bio-Key Scientific Equipment Company. The surplus according to the financial balance was 656.05 US\$. The decision made by IAS committee meeting in Guangzhou was that half of the surplus would belong to the IAS and half of it would belong to the AAS. So, 328.03 US\$ will also be transferred to the IAS bank account along with the IAS membership fee. Another 328.03 US\$ will be transferred to the AAS bank account.

Business meeting

Secretary report by Inderjit

IAS has elected new Executive Board members at the 6th World Allelopathy Congress, Guangzhou, China 2011. The new board members are: Leslie Weston (President), R. Reigosa Pachi (Vice President), David Gealy (Treasurer), R. Zheng (President Elect), Azim Mallik (Editor) and Catherine Fernandez (Secretary). The names of A.L. Alsaadawi, A.S. Ahluwalia and Rick Lankau were proposed to be included as member at Large. The next conference will be held at Vigo, Spain in July/August 2014.

I thank past president Dr Steve Duke for his cooperation during my term as Secretary, and welcome the new President Leslie Weston. I hope to see you all in Vigo 2014.

Treasurer's report by Dr Prasanta Bhowmik

Financial report

As Treasurer of the International Allelopathy Society,

I am pleased to report that we had a successful Sixth World Congress in Guangzhou, China. We all thank Prof. Shimming Luo and Prof. Rensen Zeng for hosting such a conference. Also, I personally thank them for collecting IAS membership fees at the congress.

The local Organizing Committee received \$75,968.81 as congress registration fees and others. The expenses for the congress were \$75,312.76. Thus, the congress had a net balance of \$656.05. According

to IAS Bylaws, IAS treasury receives 50% and the other half goes to Regional Allelopathy Society. Thus, IAS has received a surplus/misc amount of \$328.03 from the Sixth World Congress. A detailed report is available from Prof. Shimming Luo.

IAS Membership status

Our membership has remained in flux at The Sixth World Congress in Guangzhou, China. A total membership fee of \$3,540.00 was collected from 55 individuals, including 42 regular and 13 student memberships.

Currently, we have a total of only 74 paid members, including 13 life members (Table 1). It is interesting to note that 13 new students registered at the Sixth World Congress, Guangzhou, China. However, 15 student members who registered at the Fifth World Congress, Saratoga Springs, USA did not continue their membership. Also, it is important to know that there are 73 members who paid their dues at the Fifth World Congress have not yet renewed their membership in 2012. A detailed membership list has been developed and will be handed over to the new treasurer.

Table 1. Status of Triennial Membership (2009 – 2012)

2009-2011 Fifth World Congress		2012- current Sixth World Congress	
Membership type	Number	Membership type	Number
Regular	97	Regular	48
Student	15	Student	13
Life member/Emeritus	5	Life member/Emeritus	13
Total	117	Total	74

Financial status

I am pleased to report that we had a balance of \$17,985.89 as of December 5, 2011. Now, the IAS treasury has a net worth of \$21,906.92 as of March, 2012.

Finally, I would like to thank all Executive Committee members for their support as well as to all members of the society for allowing me to serve as Treasurer of the society for two terms. Now, the IAS is in good hand, and Dr. David Gealy, USDA-ARS, Little Rock, AR is our new Treasurer (2012-2014). Good luck David!

IAS Awards

During the buissness meeting, the IAS Awards were given to:

Drs. Prasanta Bhowmik and Francisco Macias, joint winners of the Molisch Award for their

outstanding academic achievement and service relating to the field of allelopathy (Prasanta Bhomick is in the left in the photos, Francisco Macias was not present during the ceremony);

Dr. Rensen Zeng, winner of the Grodzinsky for its publications relating to allelopathy since the last IAS-sponsored congress (in the middle in the photos);

Changxun Fang (Fujian Agriculture and Forestry University, China) for the Rice Award that rewards the best oral communication by students during this 6th congress (in the right in the photos).

The winners during the ceremony awards

Congratulations to them for their contributions to allelopathy research.

International Allelopathy Executive Committee

The new executive committee was elected during the buissness meeting of the 6th Congress on Allelopathy. You could find in the last page of this newsletter, the adress of all the comitee.

From the left to the right Steve Duke, Catherine Fernandez, Manuel Reigosa, Leslie Weston, David Gealy, Azim Mallik and Rensen Zeng

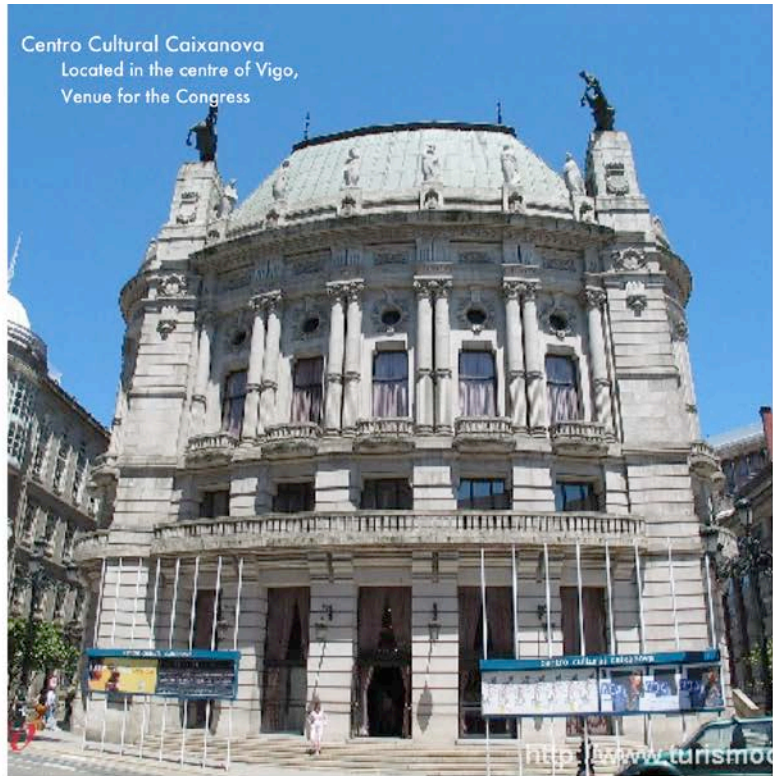

2014 World Congress on Allelopathy

During the congress and the buissness meeting, the society have decided to accept the proposition of Manuel Reigosa to organize the next and 7th International Allelopathy Society Congress in Vigo, Spain in 2014. You could find below the first circular about this congress prepared by Manuel Reigosa. We hope to see all of you during this congress.

IAS 2014

VIGO
SPAIN

Centro Cultural Caixanova
Located in the centre of Vigo,
Venue for the Congress

VII International Allelopathy Society Congress.

The local organising committee wants to invite you to participate in the 7th World Allelopathy Congress

Dear colleagues, on behalf of the local organizing committee it is my pleasure to invite you to come to Vigo at the end of July, 2014. We are working to prepare a good Congress hopefully as good as the previous Congresses.

All the information will be

delivered in the Congress web page as soon as possible. Now we can inform that the cost of the registration will be exactly the same as in the excellent congress in Guanzhou. We are still working in order to prepare the venue (we are now providing the information about the main venue, but we are still open to other possibilities).

Manuel Reigosa.

Vigo and surroundings

1. Included visit to Cíes Islands

Half a day is scheduled to visit Cíes Islands

2. Visit Vigo-Baiona-A Guarda

Included in the congress, we will visit Vigo, Baiona medieval castle and the mouth of the Miño River, border to Portugal

1

Venue

The Congress will be celebrated the last week of July, 2014 (tentative dates: 28-31 July + 1 day for visits). The Congress will take place in the Caixanova convention center, that includes two historical buildings located in the same street.

First building is the Theatre. It has two very big and artistic rooms, plus two places adequate for poster showing and four small meeting rooms.

2

Two buildings

Theatre

1. Main room

The theatre includes two main rooms adequate for main sessions (pictures 1, 2 and 5)

2. Poster sessions

Usually posters are exhibited in the corridors. Figure 4 shows one of the possible places for poster sessions

3. Other rooms

In the same building many other rooms are prepared, from 50 to 150 people attending and all the audiovisual facilities.

4. Social Centre

Just crossing the street, there is another centre specialized in congresses. In this case, an old stone building holds a completely new and reformed set of rooms totally devoted to congresses (picture 3).

1

2

Venue

The main (still unconfirmed) venue will be in Caixanova Convention Center. Other alternatives are still being studied, trying to keep the Congress as economically viable as possible.

Location

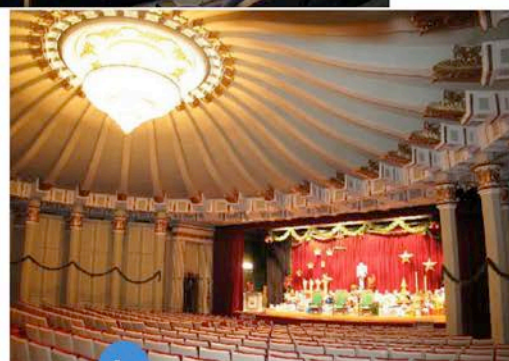

All the possible locations are in the downtown.

3

4

5

Vigo city

Vigo is a city that has its roots in the pre-roman celtic civilization. Romans liked the surroundings and the fishing and there are several archeological sites from Roman empire.

1. El Castro Hill

From this hill, an old castle built to control pirate ships dominates the old town and the Ria

2. The old town

Although most of the city of Vigo is quite new (s. XIX-XX) there are still some interesting buildings from older times, including several pre-roman and roman places

3. Castrelos park

In this park there are interesting gardens, with many different autochthonous and exotic species and a medieval palace.

4. Samil beach

Of course, one of the main attractions of the Ria de Vigo are the beaches. Vigo has the famous Samil beach

5. La Guía hill

One of the main places to see Vigo

Getting to Vigo

Vigo is easy to reach and is well connected within a network of roads and motorways that link all the main towns and cities in Galicia, the rest of Spain and internationally. The port, airport, road and rail network provide a wide range of travel options suitable to all.

<http://www.vigoenfotos.com> (© J. Albertos)

By Road:

There are three main routes:

- The Northwest Dual Carriageway links Vigo to Madrid and the central plain (667km).
- The Rías Baixas Dual Carriageway from Vigo to the motorway to northern Portugal, passing through Tui, Braga and Porto and going on to Lisbon. It also links up with the motorway from Vigo to Baiona.
- The Atlántico Motorway links Vigo to northern Galicia, passing by Pontevedra, Santiago and A Coruña.

By Bus:

Main routes are from Vigo to Madrid, Barcelona, Asturias, Bilbao, Irún, San Sebastián, Zaragoza,

Extremadura, Andalucía, among others. There are also international routes to Portugal (Porto, Lisbon and the Algarve), France, Switzerland, Belgium, Holland, Denmark and Germany.

Vigo Bus Station: Tel: 986 373 411

By Train:

There is a wide range of express trains and a daily TALGO to Madrid and Barcelona. Direct trains go to León, Ponferrada, Bilbao and Alicante.

International Information: 902 243 402 www.renfe.es

By Sea:

Thousands of visitors arrive in Vigo each year on cruise liners such as "Queen Mary II", "Independence of the Seas", "Voyager of the Seas", "Queen Victoria", "

Arriving to Vigo

Vigo airport receives flights from Paris, Madrid and Barcelona

Three airports in Galicia, one in Porto. There are other two airports in Galicia (NW Spain): Lavacolla (Santiago de Compostela) and the smallest A Coruña. Lavacolla is an international airport, although the connection to Vigo is not very easy. Porto airport is a big one, connecting major destinations in Europe and South America. It could be a good alternative to Vigo airport.

2. From the airport to the city

For pre-designed days, a University bus will work as a shuttle for transport of the people coming to the Congress. There is also a very cheap bus, and the taxi fares are fixed and cheap (17€ in 2011)

3. Visiting the city

There are touristic buses you can stop and jump again in the next bus, spending some time in each stop. But we will offer a visit to Vigo free of charge

4. Ship transportation

There is a quite cheap transport to the surrounding villages in the Ria of Vigo. The boat station is very close to the congress venue.

5. Other destinations

Galicia is full of different landscapes and cities that are worthwhile to visit. We are including a bunch of different possible visits to perform during and after the congress

Hotels

Hotels and residences are standard. Many different prices are available. The situation of the Congress venue is excellent to use many different hotels. There will be an offer of university residence rooms, especially for students both in the campus and the city.

Visit to Baiona

Baiona is a small village very close to Vigo

1. New town

The small fishermen harbour is in the downtown. The new town is full of small restaurants dedicated to seafood.

2. The castle

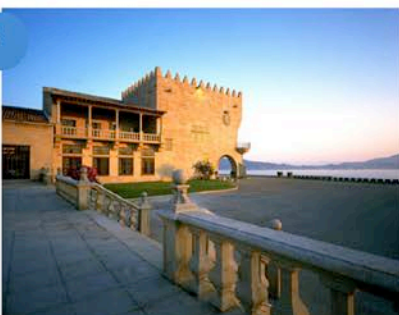

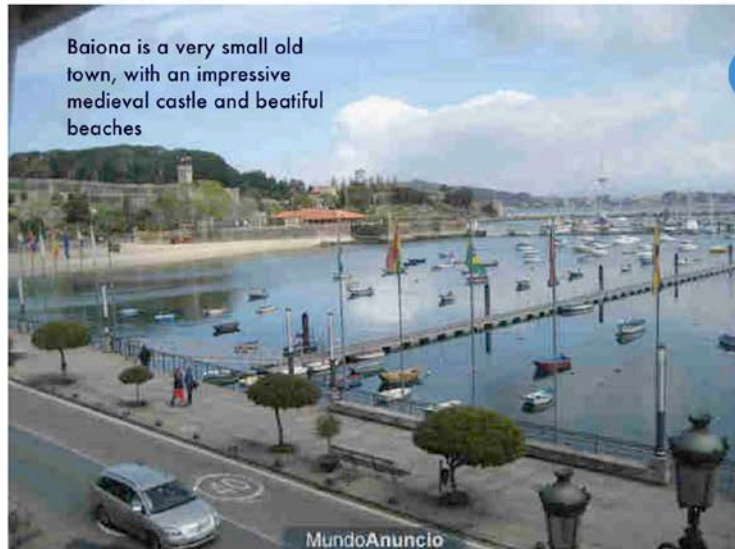

In the old castle (2), there is a hotel (5).

3. Baiona bay

Inside the Ria de Vigo, but with its own flavour, the bay of Baiona is a touristic destiny for many Spanish people, who like the peace of the days and the animated nights.

4. Very good seafood

Baiona is very well known for the atmosphere of the old medieval town, but it is also famous for the quality of its restaurants.

Only Roman lighthouse completely conserved (and still useful)

1

Other visits in Galicia

1. Coruña

A really beautiful city, including the Roman lighthouse "Hercules Tower" shown in the picture and many interesting scientific museums.

2. Santiago de Compostela

Pilgrimage centre for the European Christians during the Middle Ages until now, the city is a stone symphony. In the image, the main entrance of the Cathedral

2

3. Lugo

Surrounded by a Roman stone wall, this city maintains intact many of the Roman and medieval buildings, including the cathedral

3

4

4. As Mariñas

Galicia is surrounded by the Atlantic Ocean. The Rias Baixas (the main estuaries) are very famous, but the As Mariñas Coast is also very well known. In the picture, the beach "The Cathedrals"

Allelopathy.

Advances and uses of Allelopathy

The congress should include all the topics that are active in research related to allelopathy

Two satellite meetings

The main lines of the congress proposals should not be really different from previous congresses. But we should like to include two additional one-day mini-symposia in fields that are close to allelopathy but not really dealing everyday with it: Weeds and invasive plants and Organic Farming

Weeds

Weed science in Europe is quite active, and we feel that we could attract some of the main scientists working on invasive species to a mini-symposium. They should be considered as fully participants in the congress, and all the discussion should be wellcome.

Organic Farming

European Societies for the

Development of Organic Farming have interesting field demonstrations of allelopathic effects... even without naming it. The use of mulches, intercropping and other agricultural systems that allow diminishing the use of pesticides are a field that is quite near to allelopathy. Another section should be provided for those

scientists.

European initiatives

We should also try to attract to the congress those scientists involved in COST actions related (directly or indirectly) to allelopathy. We should provide a forum for them to disseminate their results, and they should also benefit of knowing the state-of-the art in allelopathy

Key points

Including the best speakers

Those who are most active in publishing, trying to cover all the possible approaches.

Including scientists from other fields

One of the most interesting characteristics of IAS is that it is an open scientific society, corresponding to an open mind. We need to learn from others... and let them learn about actual research in this particular field

Including two satellite sessions

We need more scientists who are not mainly involved in allelopathy research to consider this phenomenon as a possible explanation for what they see in the field and as a possible way to act on ecosystems.

This especially wellcome for scientists working on weed control and on organic farming

BUDGET. It should be quite similar to previous congresses. Vigo is cheap, and there are grants

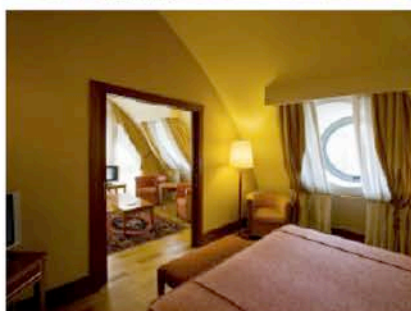

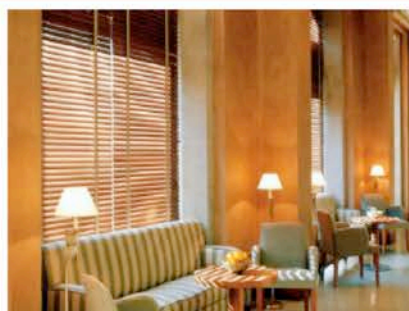

Income	US\$	Outcome	US\$
Registration fees	67500	Travel support	30000
Local Government	6000	Abstracts	2500
Spanish Government	6000	Publication	12000
European institutions	12000	Organization expenses	10000
University of Vigo	3000	Reception	15000
Vigo city hall	5000	Food	15000
		Visits	15000
Total	99500		99500

Main objectives: Get bigger. To encourage discussion between people with different approaches

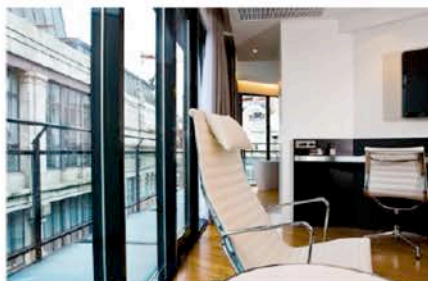

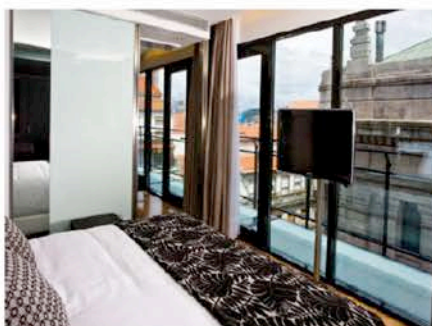

HOTELS

All shown hotels are really close to the Congress venue (less than 5 minutes walking)

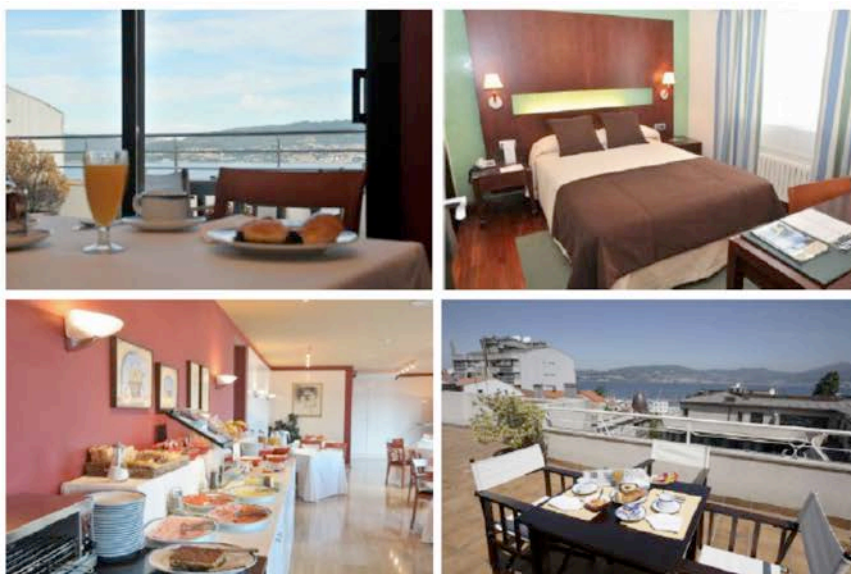

Cost is variable, ranging from 40 to 90 euros per night.

HOTEL NH PALACIO DE VIGO

HOTEL INFFINIT VIGO

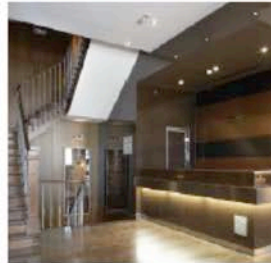

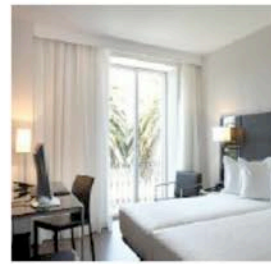

HOTEL AMÉRICA

VIGO

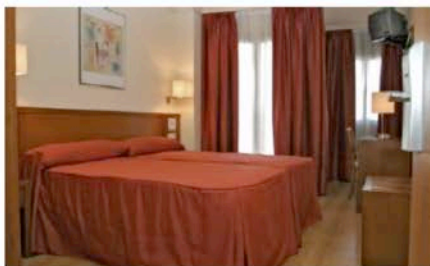

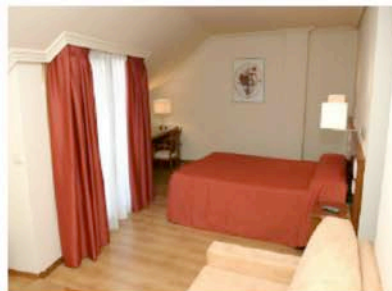

GRAN HOTEL NAGARI

VIGO

HOTEL AC
PALACIO UNIVERSAL
VIGO

HOTEL
HUSA OGALIA
VIGO

For students

In the proposed dates, there are also cheap rooms for students in the Campus. There are direct buses to the congress venue.

The total number of rooms in a five minutes walking radius is more than 300 double rooms. The student facility adds more or less 100 additional rooms (far

from the downtown, but well connected)
